

Dear sir,

Last night I tried to submit phone numbers to place on the list.

Only one took. One other which was important I had to use a phone since you blocked me from submitting again. I received no emails except for the one number. Below is the details:

Phone #s	Results
203-227-6527	Did not receive an email but was forced to use the phone to make sure this was registered.
203-434-5466	Received email after two submittals and finally registered.
203-434-9408	never received an email and as such now unable to register on time.
203-434-2904	never received an email and as such now unable to register on time.

Could you please assist in correcting these issues and if possible register the two numbers that were not so that they make the deadline. We did submit them and it is your website that had the failures.

Thank you for your assistance.

The Agars
